Summary

I currently have 5 years experience in Retail and customer satisfaction. I am passionate about coding and the things that it can bring to live. I have really come to love seeing the way code can change and shape websites, and the user experience. I continue to love learning how coding is continually changing and the ways that what another coder accomplish makes all of our lives easier, as well as looking for ways to be the one who changes how things are done.

Skills

- JavaScript
- MySQL
- HTML
- SQL
- Git
- MongoDB
