## Summary

I currently have five years of experience in Retail and customer satisfaction. I am passionate about coding and love seeing all the ways coding can bring websites, and the user experience to life. I continue to enjoy learning how coding is evolving and the ways other coders' accomplishments make all of our lives easier, as well as looking for ways to be the one who changes how things are done.

## Skills

- JavaScript
- MySQL
- HTML
- SQL
- Git
- MongoDB
- Bootstrap

## Projects

- Budgetek - <https://github.com/eshumway1045/Budgetek>
